

# COAST PHYSICAL THERAPY

## Medicare and Cap

As you know, Medicare has a Physical Therapy cap of \$1960 and there are options to continue therapy after the cap has been met. We will alert you when you are reaching your Medicare cap. However, when you get there, we need to have on file what you wish to do regarding your insurance. There are several options available to you.

Please circle the option you wish to use when your Medicare caps:

1. KX modifier

This modifier allows you to go beyond the \$1960 cap to \$3700 with Medicare. This means you will use up all of your Medicare for physical therapy for the year.

2. If you have a secondary that becomes primary when Medicare meets the cap, you can let Medicare cap and the secondary become primary. You may have a copay with your secondary and you will have used up your Medicare for physical therapy for the year.

3. You may stop your Medicare at any time and become Self Pay for \$40 a visit. If you do this before you reach your cap, you will still have Medicare available should you need it the rest of the year.

If you have any questions, the office staff will be happy to address them.

I acknowledge Coast Physical Therapy has notified me of my options regarding Medicare and I have stated my wishes regarding my Medicare.
